### SEOS Ltd

#### The Company

SEOS is a leading global supplier of immersive visual display solutions, offering a complete design, development, production, installation and support service. Our products are used worldwide in simulators for military and commercial flight, air traffic control, marine, surface transportation and digital immersive theater applications.

#### What they said about us

The consulting services provided by Style & Gravitas were of a high quality as the consultant took the time to understand our needs as a business and apply that knowledge into a model that worked for us. The consultant was always contactable to assist us when necessary after implementation and adapted the training sessions to utilise our own data and information needs

#### What we did for them

Over the past 2 years we have worked with SEOS staff to develop their Prophix budgeting, forecasting and reporting system.

One of their business challenges is to forecast project oriented revenue and costs where the time span can range from months to a number of years. We designed and wrote an Excel function that encapsulated the complexity of the calculation to just 4 arguments.
